Experience & Training

Web Developer, Freelance

[Fiverr](#)

Remote

10/2018 - Present

- Successfully designed 160+ Websites using WordPress CMS and earned 150+ 5-star ratings.
- Ensured all websites were responsive, SEO-friendly, and adhered to best practices in web development.
- Effectively resolved technical issues and provided ongoing support and maintenance for clients.

MERN/Full Stack Training

[Sharpenr](#)

Remote

05/2023 - 12/2023

- Completed the comprehensive Full Stack Development (MERN) training.
- Enhanced problem-solving skills by tackling complex coding challenges and debugging.
- Created and consumed RESTful APIs to integrate front-end and back-end functionalities.
- Learned to deploy web applications to cloud platforms, ensuring scalability and performance.

Education

B.Tech | (07/2012- 07/2016)

- Ambalika Institute of Management and Technology | Lucknow, Uttar Pradesh

Projects

1. Mail Box Client App | [\(Live Demo\)](#)

- This is a **full-stack MERN Project** and has a login, signup, **password encryption**, and **authentication** features using **bcryptjs** and **JWT**.
- It integrates various functionalities like **composing new emails** using **React Quill Text Editor**, sending and managing inbox/sent mails, organizing favorite emails, and offering **light, dark, and cool themes**.

2. Expense Tracker App | [\(Live Demo\)](#)

- This is a **Node.js, HTML, CSS, and Vanilla JS Project**, and has the same **secured authentication** features as Mail Box Client App.
- Effortlessly manage expenses, edit or remove entries, with instant total calculation with organized expense overview.
- Prime membership unlocks a **leaderboard** for tracking financial progress. Prime users can **download expenses** and access previous downloads anytime.
- Tested on **AWS EC2/RDS**, deployed via **NGINX** and **Jenkins** for **CI/CD**.

3. Group Chat App

- This is also a **Node.js, HTML, CSS, and Vanilla JS Project**. and has the same **secured authentication** features as Mail Box Client App.
- Created real-time group chat using **Socket.io**, allowing multiple groups, member management, image sharing, and chat archiving.
- Tested on AWS EC2/RDS, deployed via NGINX and Jenkins for CI/CD.

4. React Expense App | [\(Live Demo\)](#)

- This is a Simple **React** and **Firebase** app using the **Firebase auth system** to authenticate users.
- Users can handle their profiles, request **password resets**, and initiate **email verification** processes for added security.
- Users can seamlessly create and manage their expenses, and upon exceeding Rs.10,000 in spending, unlock premium perks like **downloading all expense records in CSV**.
